

Empresa

Complex Needs Bed

Featuring Floorbed Technology

FAST

Our large warehouse and sophisticated fulfilment systems mean we can deliver with speed. This is supported by our online customer services, making it easy to track orders and re-order.

INTELLIGENT

Years of research and development have allowed us to find care solutions that are affordable, innovative and useful. Our products cover manual handling pressure care and patient safety.

CARE

We know our products inside and out and we want to share this knowledge and expertise. We help our customers find the right care solutions, as well as offering ongoing training, support and product maintenance.

Helping you deliver **exceptional clinical outcomes** and improved safety

Your choice of bed for complex needs doesn't have to be a compromise

Even with the diverse demands of clinical care, staff and resident safety, and efficiency – we've managed to bring these all together in the Empresa Complex Needs bed.

Your **first line of defence** in pressure area care

When moving from a supine to sitting position in bed, the body naturally lengthens. Empresa's BodyMove™ auto-regression feature accommodates this change, so not only does it help with pressure distribution and reduction of shear for enhanced wound care support, it improves comfort too.

Prolonged mechanical loading of soft tissues covering bony prominences, such as when an individual is in bed, may lead to degeneration of skeletal muscle tissue. Pressure redistribution and repositioning of an individual is undertaken to reduce the duration and magnitude of pressure over vulnerable areas of the body.⁵

23%

Reduction in average pressure over the sacral area, when compared to a standard nursing bed

Lower interface pressures

No regression increases friction and shear

9 cm 6 cm

BodyMove™ regression reduces friction and shear

Regression distances

Human factors at the **centre of design**

Driven by an understanding of your requirements, a range of integrated functionality comes as standard to support caregiving and make your life easier.

ERGONOMIC HANDLING

Pre-programmed “one-touch care”

Easy positioning of residents at one touch of a button, helps negate the need for lifting and saves staff time and effort. Comfortable to hold handset, accessible from anywhere around the bed.

800mm bed height

Full height adjustment for caregiver safety and aiding the delivery of high quality care to residents.

FULL NURSING HEIGHT

CARE POSITION

COMFORT POSITION

Safety first

Lockout feature

Prevents unauthorised and inadvertent use of the handset.

Auto safety-stop

Inhibits bed from being lowered below 200 mm, without caregiver action.

Tandem castors with UniSafe™ braking system

Bed rolls effortlessly and needs only a single press of a pedal to secure each set of brakes.

Adjustable padded mesh side rails

Side rails drop to below the height of the mattress making for effortless transfers.

Right product, right time, right place

You want products which optimise use of your facility and resources, and provide simple, cost-effective solutions

Balancing caregiving with operational efficiency, the versatility of the Empresa bed puts everyone in control, helping ensure excellent outcomes and maximising asset utilisation.

The Empresa bed caters for a maximum patient weight of 240 kg.

Expandable width and length

Having the option to adjust the length and width of the Empresa bed, together with a wide range of universal accessories means you can utilise assets fully, with less risk of downtime, even when the profile of your residents changes.

Raises vertically

Uses a vertical lift mechanism to raise the bed, reducing space demands and helping prevent damage to walls.

Simplified decision making

The Empresa bed enables you to standardise on bed choice, helping to streamline procurement, reduce training needs and future-proof your requirements.

Support from start to finish

Working as part of your team, we will help capture your requirements and refine your specification. And our complete turnkey service and dedicated project management team will make implementation smooth and easy.
